3. METHOD

The outcomes of a Dialogue are influenced by the method that is used.

DID YOU USE THE SAME METHOD AS RECOMMENDED BY THE CONVENORS REFERENCE MANUAL?

Yes

No

4. DIALOGUE FOCUS & OUTCOMES

MAJOR FOCUS

1. Involve women and youth from vulnerable segments of the population in activities designed to protect the biodiversity in mountainous through their closer involvement in the promotion of safe beekeeping;
2. Review the legal base to eliminate contradictions on agriculture and export diversification;
3. Application of the modern irrigation approaches such as drip irrigation and preventing fast water evaporation to use water resources more effectively and prevent environment from degradation;
4. Prevent excessive and improper use of agrochemicals and veterinary drugs and widely apply good agriculture, hygiene and manufacturing practices;
5. Enhance transport/road infrastructure to support food distribution to both domestic and export markets;
6. Engage completely all irrigated and rain fed lands, mostly Presidential and household plots;
7. Planning planting quality seeds and seedlings pursuant to the regional climatic peculiarities;
8. Provide scientific support for assessing land and animals fertility and adaptation of the seeds, seedlings and animals species to the country climatic conditions;
9. To support dehqan farms and food processors in improving their access to machinery parks and other modern technologies for processing, packaging and labeling of the produce;
10. Improve capacity of food control bodies in laboratory testing, categorization of the food operators and application of the risk based approach in carrying out control and inspection activities;
11. Introduction of the modern methods in processing agriculture products for instance drying and preservation of spring onion, fruits and some vegetables to mitigate losses;
12. Establish logistic centers in regions to support and promote collection and distribution of harvest which also support export of the agriculture products;
13. Increase number of storing facilities and equip them with refrigerators to prevent losses. For this also provide scientific support in good storing practices based on modern harvest and post-harvest technologies;
14. Widely apply internationally recognized standards and methodologies in food production such as ISO, GHP, GAP, IPM, HACCP, Codex Alimentarius;
15. Facilitate widely trans-boundary trade by simplification customs procedures, reconstruction of roads;
16. Promote marketing of the agriculture products in domestic and international markets to enhance demand based production (for instance for spring onion, melon, watermelon, lemons, fresh, canned and dried fruits and vegetables);
