# 4. DIALOGUE FOCUS & OUTCOMES

## MAJOR FOCUS

Summary of the national dialogue of the Czech Republic:

The coordinator of the national dialogue in the Czech Republic was Mr. Jindřich Fialka, Deputy Minister for Agriculture and Food of the Ministry of Agriculture. A total of 220 actors across the agri-food chain were addressed in the national dialogue. Most of the subjects contacted were in the field of food processing (126), followed by the water and small government sectors (17), to those in the crop and animal production sector (11) or aquaculture (5). The basis for the national dialogue were existing strategies for the Ministry of Agriculture until 2030. The dialogue received extensive feedback and the original framework of topics has grown into an inspiring collection of suggestions that should be addressed in building sustainable food production systems.

## MAIN FINDINGS

The National Dialogue in the Czech Republic has generated the following weaknesses, which best correspond to the UN's sustainable development goals. The following areas were most discussed in the dialogue, so the need to address them is significantly emphasized by the professional public:

- Dry areas, low water retention in the landscape
- Decreasing soil quality due to lack of organic matter in the soil, soil compaction, lack of soil-improving crops, etc. and subsequent erosion
- Weak consumer education
- Insufficient transfer of knowledge, especially the use of results of science and research in practice.
