MAIN FINDINGS

Key findings/recommendations from the dialogue include:

- i. There is a need to pertinently develop food systems as food insecurity seems to vary in the country.
- ii. The country needs to consider the multiplication and distribution of nutritious foods for its population.
- iii. Research must continue to play a role, especially in production and marketing
- iv. Food loss along the value chain is very high; there is a need for deliberate and intentional approaches to improve postharvest handling
- v. The urban poor face more food insecurity since they have low income and can't afford food
- vi. Land ownership and utilization still has challenges to foster the development of food systems; the cost of land for production is high. Therefore, a lot in the policy environment needs to be done to favor production.
