MAIN FINDINGS

This second stage dialogue reinforced many of the findings of the first national dialogue and went more into depth regarding the vision statements provided there. It highlighted that many solutions are already in place on a local and regional level and that there is potential for scaling up, but that the national level is at times too slow and that regulations, for example regarding public procurement, are sometimes obstacles. The dialogue also highlighted the necessity for youth to express their view and showcased examples of this. It also showcased the perspective of immigrant groups and their contribution to a diversified food system in Sweden. For details please see attachment.
