MAIN FINDINGS

The main remarks of the participants are as follows.

- (1) In order to increase the understanding of society on the cost increase, it is important that the value of agricultural products produced in environmentally friendly manner is recognized. For this purpose, labeling and information disclosure using digital technology are important.
- (2) Innovation is important for cost reduction.
- (3) Efficient application of fertilizers and pesticides is important. In order to improve efficiency, the major issues are the consolidation of agricultural land and the outsourcing of work in areas where farmers cannot handle it.
