<input type="checkbox"/> Large-scale farmer	<input type="checkbox"/> International financial institution e.g. World Bank, IMF, regional bank		
<input type="checkbox"/> Local Non-Governmental Organization	<input type="checkbox"/> Private Foundation / Partnership / Alliance		
<input type="checkbox"/> International NGO	<input type="checkbox"/> Consumer group		
<input type="checkbox"/> Indigenous people			
<input type="checkbox"/> Science and academia			
<input type="checkbox"/> Workers and trade union			
<input type="checkbox"/> Other (please state):			

Urgency: We recognize the utmost urgency of sustained and meaningful action at all levels to reach the respective 2030 Sustainable Development Goals.

Respect: Within our respective capacities and circumstances, we will promote food production and consumption policies and practices that strive to protect and improve the health and well-being of individuals, enhance resilient livelihoods and communities, and promote good stewardship of natural resources, while respecting local cultures and contexts.

Complexity: We recognize that food systems are complex, and are closely connected to, and significantly impact, human and animal health, land, water, climate, biodiversity, the economy and other systems, and their transformation requires a systemic approach.

Multi-stakeholder inclusivity: We support inclusive multi-stakeholder processes and approaches within governments and communities that bring in diverse perspectives, including indigenous knowledge, cultural insights, and science-based evidence to enable stakeholders to understand and assess potential trade-offs and to design policy options that deliver against multiple public goods across these various systems.

Engage: We commit to practice what we preach personally and professionally to contribute to the vision, objectives and the final outcomes of the Food Systems Summit.

Complement the work of others: Recognizing that issues related to food systems are being addressed through several other global governance processes, we will seek to ensure that the Food Systems Summit aligns with, amplifies, and accelerates these efforts where practicable, avoiding unnecessary duplication, while encouraging bold and innovative new thinking and approaches that deliver systems-level transformation in line with the Summit's principles and objectives.

Build Trust: We will work to ensure the Summit and associated engagement process will promote trust and increase motivation to participate by being evidence-based, transparent, and accessible in governance, decision-making, planning, engagement, and implementation. We – from member states to private businesses to individual actors – will hold ourselves accountable for commitments made with mechanisms in place to uphold this accountability.

I have read and I understand the Food Systems Summit Principles of Engagement	<input type="checkbox"/> YES	<input type="checkbox"/> NO
